

## **Stage 2 user manual**

This project contains three classes namely;

- 1. grading class.**

The method for grading of students marks is in this class.

- 2. student class.**

This class contains;

A class constructor, a method to compute average mark of a student and finally a method to print out the student's report, one student at a time.

- 3. table class**

This mainly contains the main method.
