

User manual for Stage 1 project

The project is made up of two classes, that is the Gradings class and the Table class.

1. In the Gradings class

It's where the program for grading of marks is found.

2. In the Table class

This class contains the main method and it's where the program for printing out the students report is found.

The program to print out the report is found here, programs to compute mean and standard deviation are also in this class , the program prints out the report of all students at one time.
